E-learning Industry & Market Research

Distance Learning Journals and Reports

Students, educators, and researchers who are interested in the vast worlds of e-learning and distance learning programs and educational technology, will want to take advantage of the many educational technology and distance learning publications, journals, and reports that are available in print and online.

These journals and reports will give you access to current information, research, and discussions about the rapidly growing world of distance education and about the use of technology in the educational field.

Because the industries of online education and educational technology are developing so quickly, it is easier than ever for students of all kinds to obtain their college degree. In the United States, Australia, Canada, Europe, the United Kingdom, and throughout the world, more and more students are reaching their educational goals through distance and e-learning programs.

As the #1 e-learning resource on the web, World Wide Learn strives to provide you with the most up-to-date listings of distance and e-learning journals and reports that are designed to deliver information about distance learning and educational technology, and to support and promote accessible higher education and training in the United States and throughout the world.

Use this section as a resource to access distance learning journals and reports and to find information about the wide community of supporters and promoters of distance and e-learning academic programs and educational technology.
